Multimedia Product Utilities

Type: No SystemSoft for IBM Notebooks
Windows 95B / 98 (first release)

Version: **1.0a**
Date: 05/02/98
File Size: 28KB

The following is the utility to enable Plug-and-Play support for IBM notebooks running 95B/98 (first release) with SystemSoft CardWorks.

Note: This driver is posted for IBM notebooks ONLY.

 [Nosysoft.exe](#)

Type: DirectDraw Test Application

Windows 95/98

Version: **3.2**

Date: n/a

File Size: 134KB

The following is the utility to check for the VGA/VPE driver to see if it supports 16bit VPI (Video Port Extension) Port Width for the WDM-based driver.

Installation Information:

Run DDTest, click on Connect then click on Video Port. The Connection Info list should contain several entries with Port Width of 16. If you see a Port Width of 8 then your VGA/VPE driver DOES NOT support 16bit. Check with the VGA provider and/or your notebook manufacturer for an updated driver.

 [ddtest.exe](#)

Type: Disk Memory Access (DMA) Optimization

Windows 95/98

Version: **n/a**

Date: n/a

File Size: 31KB

The following is the utility to obtain better performance by enabling DMA for notebooks equipped with Texas Instruments (TI) PCMCIA socket controllers.

Installation Information:

Extract DMA.exe into a temporary folder. DMA can be enabled by merging the DMAON.REG file with the Registry. To merge a file simply double-click on the REG file. If you encounter any problems, DMA can be disabled by merging the DMAOFF.REG file.  [DMA.exe](#)
